Construction Area (m2):	38 145
Construction Cost (Million MOP\$):	n/a

Having increased their offers for bachelor's and master's degrees, the University of Saint Joseph (USJ) is in need of additional campus space. Therefore, USJ has planned to build a new campus in Ilha Verde, Macau, which includes a university, a senior secondary school, a dormitory for students, residences for teachers, a communitarian centre and a chapel.

The main concept of this planning is the special dialogue between exterior and interior spaces, the senior secondary school and the university.
