INTERVIEW WITH ANTÓNIO TRINDADE AS MIECF KICKS OFF

# Macau "lost its place" as a reference point for environmental issues

CESL Asia's chief executive officer, António Trindade, met the Times yesterday in the company's stand at the 2013 Macau International Environmental Cooperation Forum and Exhibition (MIECF) that kicks off today. Trindade, who is also the president of the Environmental Protection Industry Association, gave a broad picture of the environmental issues that affect Macau, from water management and waste collection to transportation and urbanism.

**MDT – Is Macau becoming more environmentally efficient? Are the best technologies being applied here?**

**A.T. –** Macau is obviously evolving on a lot of this. I believe that we [CESL Asia] are pioneers and a reference in bringing in technologies, adapting them for the local requirements and most of all, servicing those technologies. What is happening is that, in the past six or seven years, Macau has changed. All the situations in Macau
